1. For the Logarithmic function $f(x) = \log_2(x)$

- From Table of coordinates of the function $f(x) = \log_2(x)$, we plot the continuous curve which represent the Logarithmic function $f(x) = \log_2(x)$.
- The domain of $f(x) = \log_2(x)$ is all positive real numbers $x \in (0, \infty)$ and the range is all real numbers $y \in (-\infty, \infty)$.
- Vertical asymptote is the y -axis which represented by the equation $x = 0$.

2. For the Logarithmic function $g(x) = \log_2(x + 1)$

- The graph of $g(x) = \log_2(x + 1)$ is obtained by shift the graph of $f(x) = \log_2(x)$ to the left 1 unit (see graph in detailed solution).
- The domain of $g(x) = \log_2(x + 1)$ is all real numbers in the interval $x \in (-1, \infty)$ and the range is all real numbers $y \in (-\infty, \infty)$.
- Vertical asymptote is represented by the equation $x = -1$.
